

The Current Health Scare

At the present time, in the year 2020, there is considerable concern about a new virus. Let's get some facts straight before we go any further. No virus has ever caused any kind of disease. All human viruses are benign and are generated inside your own body on a regular basis in order to clear away damaged tissue. Have you ever had an injury which caused a swelling? Do you remember how the swelling went down after a few days? That reduction of the swelling was done for you by a virus generated inside your own body for the express purpose of cleaning up the swelling and getting you back into full health again. Your body can generate thousands of types of virus to help you stay healthy.

Another little-known fact is that you can't "catch" a virus from somebody else. Shock, horror !! So what is all the hype about? Why are we being told to wash our hands over and over again every day? Well, I'm sorry to say, this scare-mongering publicity is a raft of deliberate lies intended to frighten you and make you willing to give up your rights and start living in a police state, ideally under a one-world government which does not care about your best interests. These charming people want to vaccinate you, but what they want to inject into you is highly harmful to you. Vaccines are engineered in a laboratory and the objective is not to cure you of anything (except perhaps your life). In the year 2020, Bill Gates has just teamed up with Big Pharma to combine vaccinations with the insertion of an electronic device which gives you "a digital identity". Have you ever heard of "The Mark of the Beast"?

All our lives we have been told about "germs" which cause illness. That is the basis for much of Western medicine. It is called "germ theory" and unfortunately it has been disproven. Yes, you heard me correctly, germ theory is just plain wrong !!

But hang on, people are dying, so what is killing them? The main answer is 5G radiation which transmits at 60 GHz. That is a weapons-grade radiation which has several effects. One of the most serious effects is that it causes a major change in oxygen molecules.

That change weakens the link between the two oxygen atoms and that makes it difficult for your blood to pick up oxygen from your lungs and if you are not in very good health, then that can be a major problem for you. The cruise ships which are quarantined and the cities and countries which have been closed down are those which have implemented 5G technology.

Another objective of this hoax scare is to give an excuse to get rid of money and so you will have to have a digital ID in order to buy or sell, or do any other financial transaction. China has already started burning money on the pretext that the notes may have virus on them (virus which you can't catch and which would not harm you even if you could "catch" the virus). In passing, please understand that you can't "catch" a virus from any other species, so "avian 'flu" and "swine 'flu" are pure fiction. Those

things are caused as a result of vaccinations. You should never, ever allow yourself to be vaccinated for anything as you have no way of telling what is being injected into you and it is highly unlikely that the injected material would help you in any way.

Anyway, just in case you haven't got the message – Covid-19 does not exist and even if it did, it could not infect you and definitely could not kill you. Stay away from vaccinations and G5.

Medical detail on radio at:

<https://www.crow777radio.com/free-episodes/> episode 203 and it's extension 230.5.1

A book which took ten years to compile states all of the relevant facts about the present situation is available from Amazon. It is entitled "What Really Makes You Ill? Why Everything You Thought You Knew About Disease Is Wrong" by Dawn Lester and David Parker. This book shows repeatedly that "medical science" is riddled with errors, misconceptions and mistaken results and in spite of it's many "authorative" pronouncements, is wholly wrong most of the time and it's vaccinations and inoculations are just dangerous poisons which just don't work at all and instead, damage patients.
